

An Inexpensive Website

The MyLocalPro profile is proving to be a very effective and inexpensive website alternative for those small businesses, especially small contractors, which do not have websites.

You can use your MyLocalPro.com link...

...in any other advertising that you do...

... add the link on your letterhead and business cards

Brings visitors directly to your profile ... no search required!

It's easy ...

www.mylocalpro.com/{your username}

Make sure you select a username that is consistent with your business name and relatively short

sample: www.mylocalpro.com/mikesauto

Intriguing

Even businesses with websites have selected to market their mylocalpro.com profile rather than their site, because it is easier to update our profile than have their webmaster change the website
