As a small business consulting company, we have heard our clients complain about the clutter of internet advertising and premier web space being purchased by those larger regional and national companies, because they could afford it!

Now, small local businesses throughout the country an affordable medium to compete with the growing on-line browsing and purchasing habits of today's consumers.

[www.MyLocalPro.com](http://www.MyLocalPro.com) is designed to provide consumers with a quick one page snapshot of all your important business content, while providing the very busy small business owner with a very easy to operate profile to update information, events, specials, pictures, videos, discounts, and more
